

HPC Industrial Engagement Initiatives: *Dreams, Myths, Realities*

IDC HPC User Forum
Santa Fe, NM, USA
April 2014

Andrew Jones
Vice-President HPC Consulting & Services
Numerical Algorithms Group (NAG)

@hpcnotes

Experts in numerical algorithms and
High Performance Computing services

Proven HPC software performance results

- ▶ Over the last 6 years
NAG HPC services have **delivered**
- ▶ >80 software innovation projects
- ▶ ~30 applications improved
- ▶ ~80% achieved >2x performance

Proven HPC training results

- ▶ Over the last 6 years
NAG HPC services have **trained**
- ▶ >2000 course attendees
- ▶ Fortran, C/C++, OpenMP, MPI, CUDA, ...
- ▶ profiling, optimisation, scalability, ...

Proven HPC consulting results

- ▶ Over the last 6 years
NAG HPC services have **helped**
- ▶ users of petascale supercomputers
- ▶ evaluate/adopt GPUs, Xeon Phi, ...
- ▶ advise on HPC strategy, procurements, ...

NAG HPC Services & Solutions

Software innovation services

- Improve performance, scalability, capabilities, ...
- Evaluate & adopt new technology: GPU, Xeon Phi, ...

Training, advice and support

- For HPC users, programmers, managers, buyers, ...

Strategy & planning

- Procurement, HPC service provision, etc.
- Application & technology roadmap planning

Results: business value & science impact

Faster, more capable R&D process

- More R&D output from a given compute resource
- Faster time to solution
- Step change in fidelity or capability of modelling

Focus on customers & business

- Rely on NAG for the underpinning HPC expertise

Plan and use HPC with confidence

- Rely on NAG for impartial advice and experience

Why engage with industrial users of HPC?

because HPC delivers
impact + value + ROI
to science and business

Lots of evidence, case studies, successes - e.g.:

<http://www.hpcuserforum.com/ROI/>

<http://www.hector.ac.uk/casestudies/>

<http://www.compete.org/about-us/initiatives/hpc/success%20stories>

Why engage with industrial users of HPC?

I'M FROM THE
GOVERNMENT,
I'M HERE
TO HELP

Political necessity

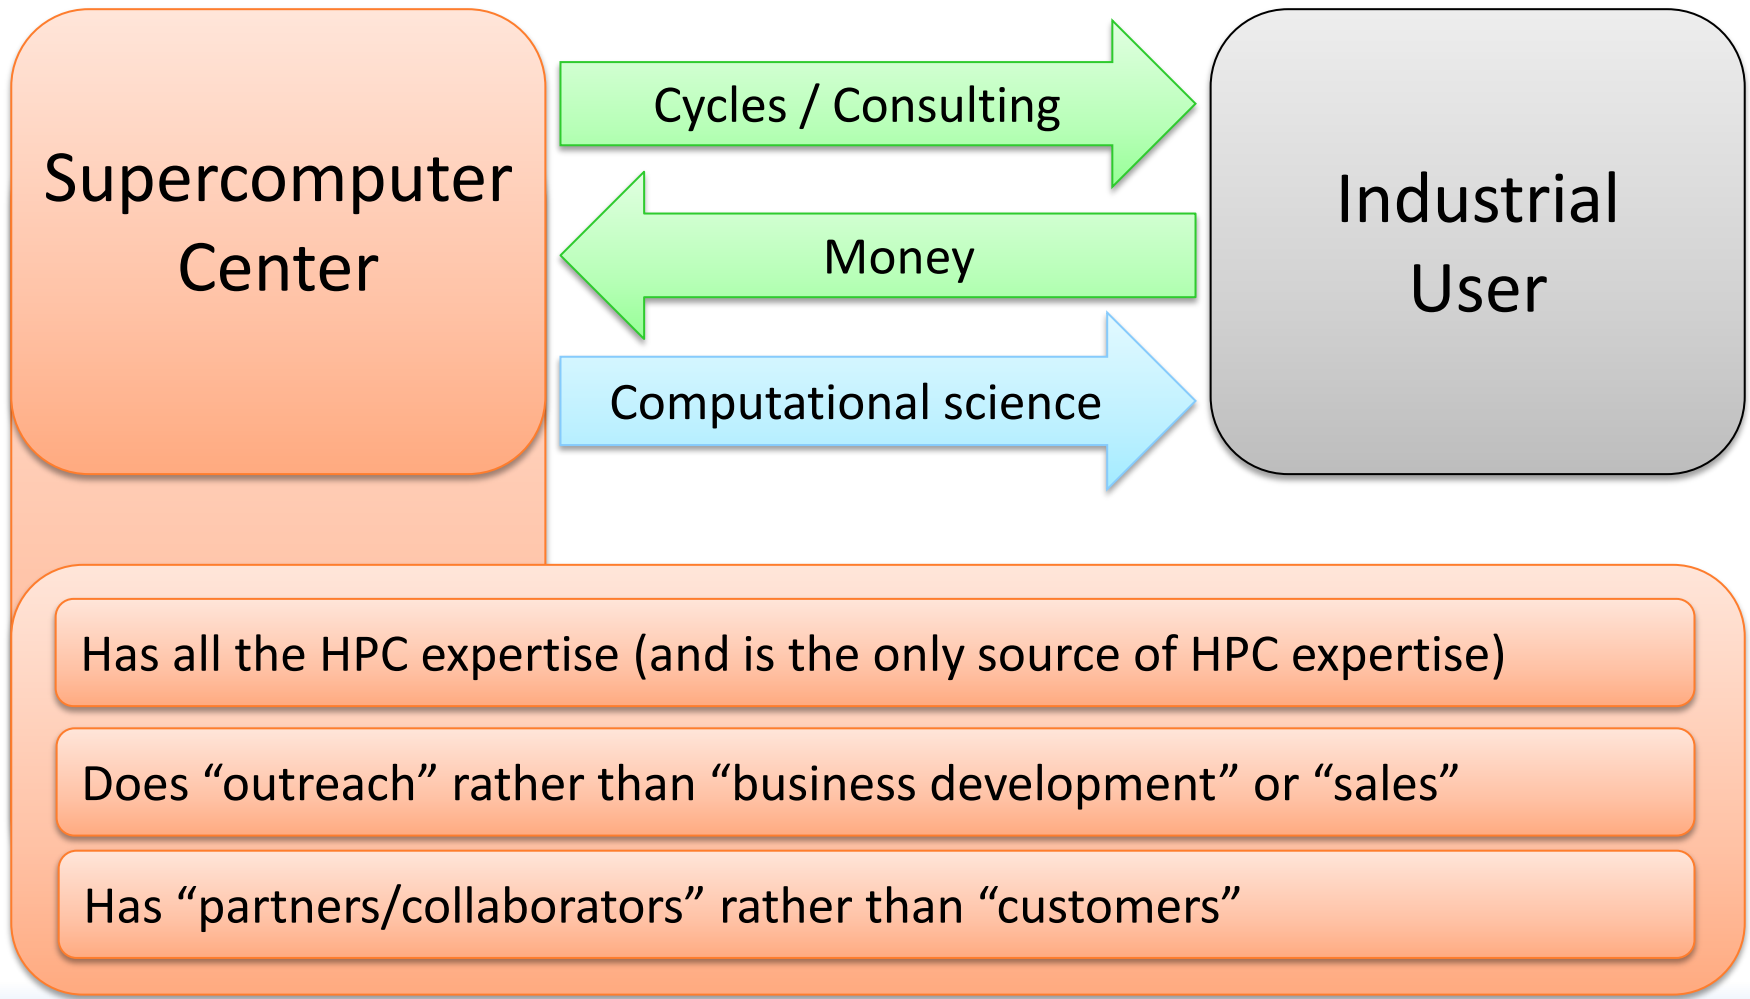

New source of income

HPC for industry is not new ...

- ▶ HPC centres around the world have tried engaging with industry for years
 - ▶ Success stories of real partnerships are still rare
 - ▶ Not many HPC centres with significant & profitable industry income
 - ▶ It is hard work and different to business-as-usual

Typical HPC industry engagement model??

Many suppliers of HPC services

- ▶ Publicly funded
 - NCSA, OSC, DoE labs, EPCC, Hartree, etc.
- ▶ Specialist HPC companies
 - NAG, Red Oak Consulting, ...
- ▶ Commercial
 - Cray, IBM, CSC, HP(EDS), AWS, ...
- ▶ In-house

IISW Survey Data

- ▶ International Industrial Supercomputing Workshops (IISW)
 - ▶ HPC centers involved in industry engagement
 - ▶ IISW-4 at SurfSARA Amsterdam in 2013
- ▶ (Anonymous) survey of participants run each year

Charge for HPC system time (US c / core-hr)

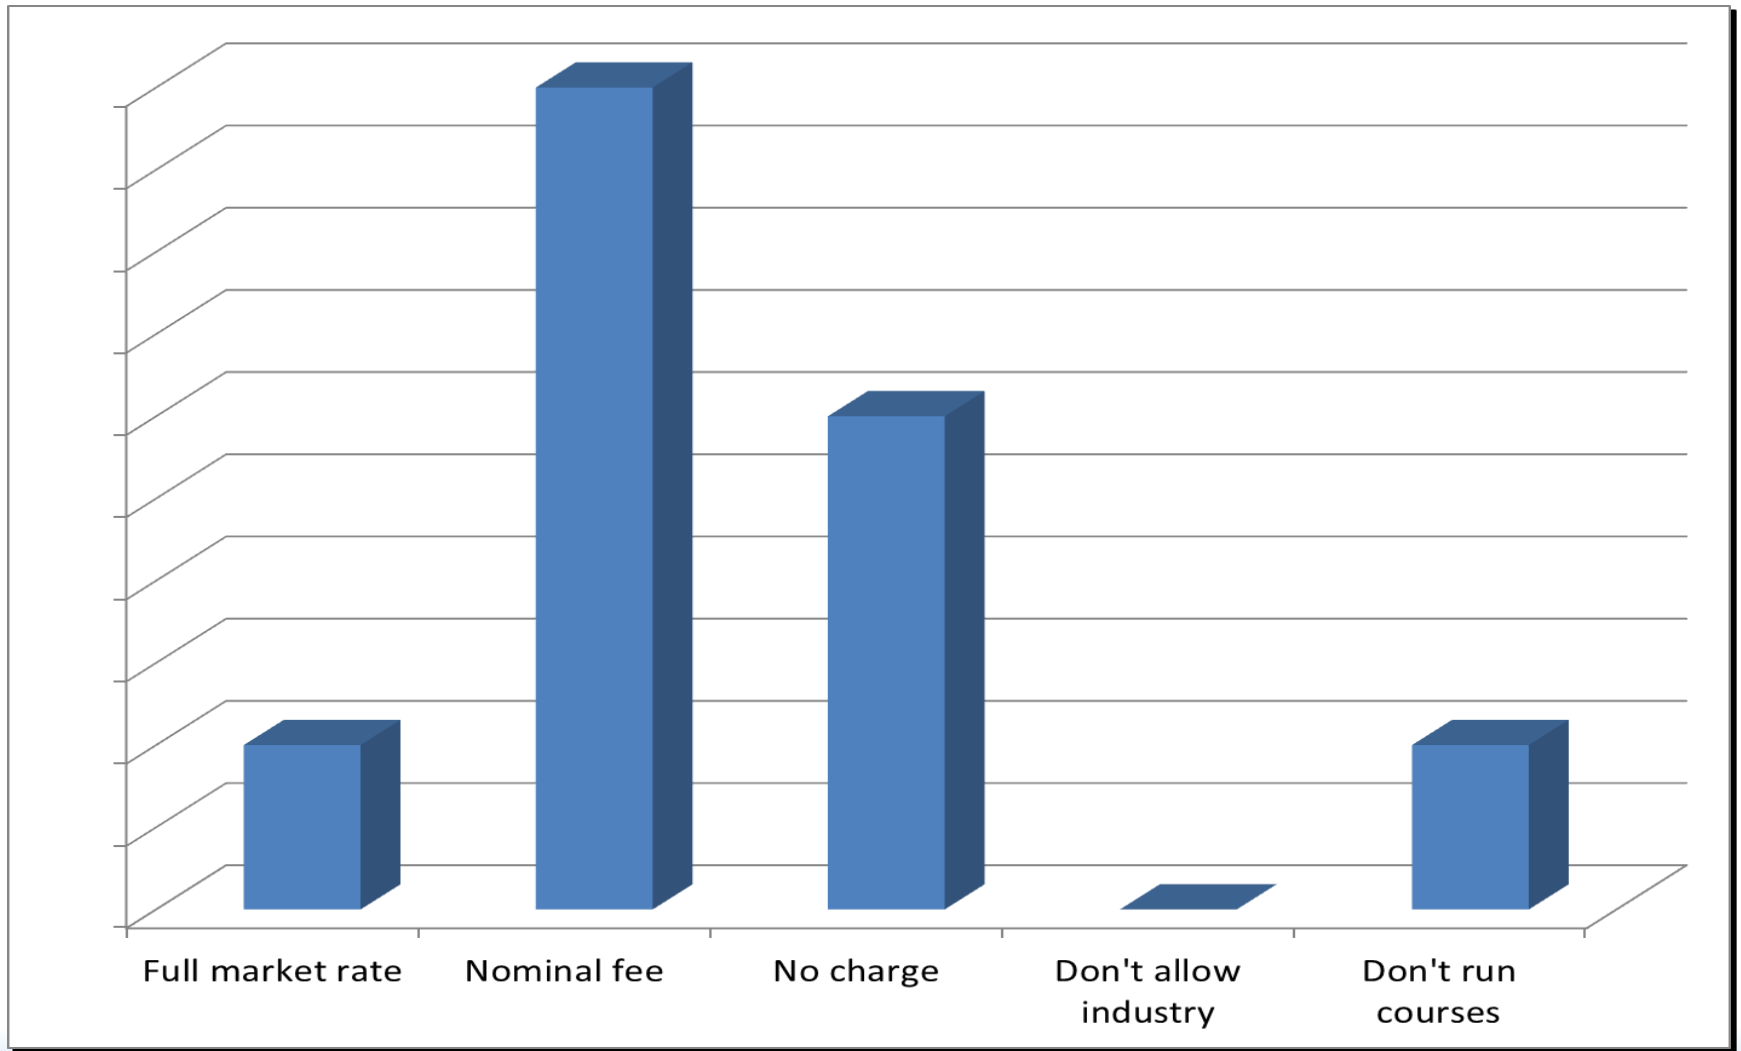

Charge for HPC consultants

US \$k / person-year

Charge for courses

Typical annual income from industry (US \$m)

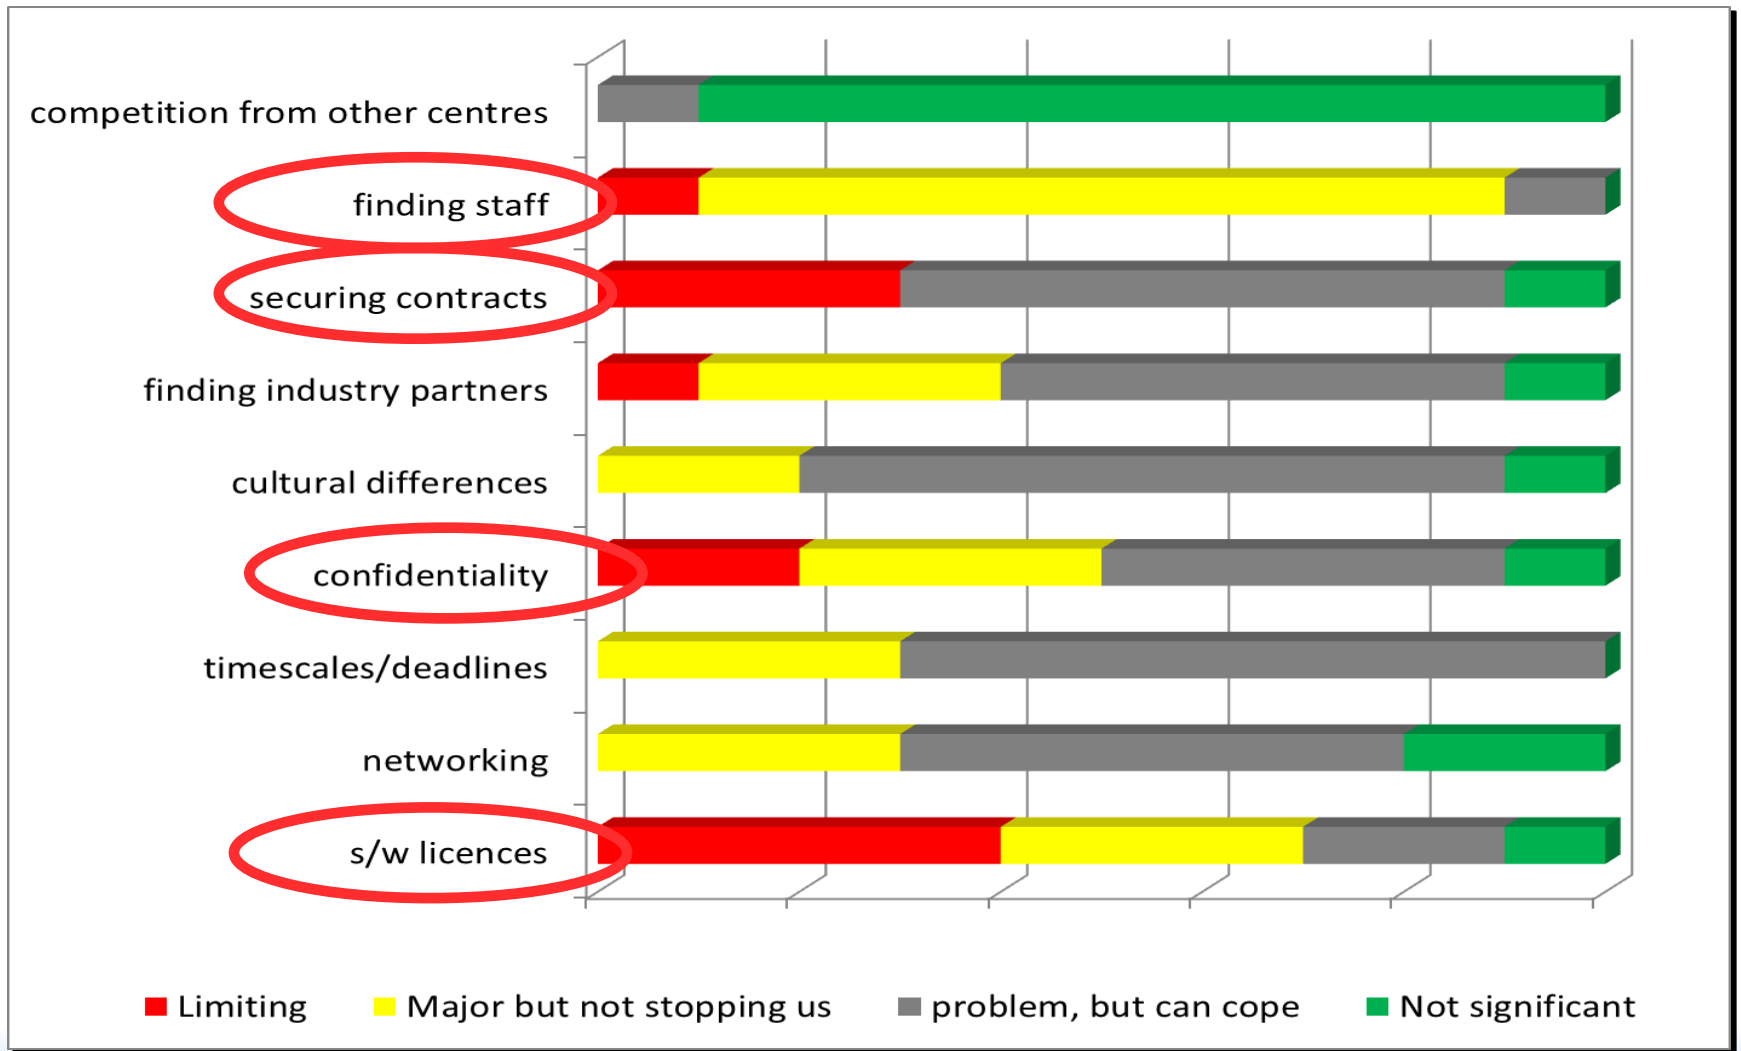

Requirement for regional focus

Which part of company do you engage with?

Challenges working with industry

Summary

Industry engagement is hard work

Need to commit & invest (e.g., sales effort)

Recognise different needs, culture, processes, ...

If (when) it works – it delivers real value to industry

@hpcnotes (Andrew Jones)

Results Matter. Trust NAG.
